

Introduction

Good Morning/Afternoon sir. Firstly, thank you for giving me this opportunity I am pleased to introduce myself. My name is Princy. I am from Hyderabad. Talking about my educational background I pursued my graduation specialization in Information Technology in 2016 and then completed M.B.A in 2018. I have an experience of 1 year in ICICI bank sales department. My family consists of 5 members. My father is a retired employee, mother is a teacher, and I have two siblings. My hobbies are listening to music, reading Google news, crafting and also I utilise my free time to share knowledge like tutoring for school students. My strengths are I am an optimistic and creative person. I look at the positive side of things and try to find out the solution to the problem. I can confidently say I am strong work ethic and passionate about work. I am a resilient person and reframe setbacks as opportunities for growth. Coming to my weakness, once I start any tasks I will not get distracted till the work finishes which sometimes leads to an unbalanced diet. My professional accomplishments, when I was working in the banking sector I used to get appreciation mails from customers for the service provided by me. As I'm in the sales department I worked really hard to achieve my targets. In future I look forward to working more enthusiastically to accomplish my goals.

Why this course

First and foremost, I am delighted to be a student in Edyoda Institute. It is giving me a platform to acquire insights about programming and I would say I made the best choice by choosing Edyoda. As I already mentioned, I have pursued B.Tech where my core subject is information technology. Though I am from an IT background I used to have ambiguity and inadequate in logic building. Due to lack of coding skills I didn't dare to step into this field. But I deeply felt a passion for coding. After then I started learning from Google, Youtube channels but no proper discipline of content. I decided to take coaching in an institute where I can improve my skills and explore in this field so I applied on various platforms. One fine day I received a call from Ms Vijetha. She gave complete detailed information about the Institute, Full Stack MERN Developer program, certifications and placements. She helped me to understand about the training programme then I decided to join this programme.

Thanks & Regards
Princy JV
